

Bagging of baking ingredients and starch in S E Asia

Last autumn Behn + Bates, Münster, Germany, specialising in open-mouth bagging systems for food and pet food industries, won two major orders from Australia and Thailand. The first of these involves filling baking ingredients into 10-25kg multi-layer paper bags provided with

PE inliner at an hourly rate of 180-240 bags.

By comparison the Thai customer produces tapioca starch that needs to be filled into 50kg bags made of woven propylene or polyethylene at an hourly rate of 220 bags. For both projects a specially tailored TOPLINE packing system will be delivered later this spring. www.behnates.com

The TOPLINE's dust-tight hexagonal filling spout completely encloses the bag from all sides
