

## ***Beumer acquisition makes it a major player in sortation technology***

Beumer Group headquartered in Beckum, Germany, which enjoys international pre-eminence in the fields of bulk conveying, loading, palletising and packaging systems, earlier this month announced that it had purchased Crisplant AS of Denmark from UK-based financial investor Melrose/FKI. Crisplant, with 950 employees worldwide and a 2008 turnover of €150M, supplies baggage sorting systems for airports as well as sortation technology for courier and package delivery service providers. To a slightly lesser extent, Beumer has also focused on this area in recent years and as a result of the take-over becomes a world leader in the high-capacity sortation sector. Following the acquisition it now has a workforce of about 2000 and a turnover of €350M. [www.beumer.com](http://www.beumer.com)
