

Beumer and Crisplant now under one UK roof

As part of the integration of Crisplant Ltd into the Beumer Group, the company in the UK is now operating under the name Beumer Group UK Ltd. Since beginning of 2010 the intralogistics specialist had been represented in the UK by its subsidiary Beumer UK with two product ranges: conveying and loading on the one hand, and palletising and packaging on the other. Customers in the field of sorting and distribution equipment had previously been served locally by Crisplant. As a result of the merger, customers in all three business sectors now have a common point of contact at the Ibstock, Leicestershire, headquarters of Beumer Group UK where there are now more than 20 staff. Together with Crisplant a/s the Beumer Group worldwide employs around 2300 people and achieves a turnover of about 375 million euros. www.beumer.com
