

Internal photography facilitates Allied Bakeries silo maintenance

Braby of Bristol, the leading UK manufacturer of stainless steel and aluminium silos, has just completed maintenance work on a 30ft flour silo at the Cardiff, South Wales, facility of Allied Bakeries. Braby Service, the company's Lincolnshire-based silo cleaning and maintenance division which was established some 12 months ago, was contracted by OCS to carry out a full inspection and thorough dry clean of the internal walls of the silo. Specialist photographic techniques were employed to ascertain the internal condition of the vessel and a full report was made to OCS and Allied Bakeries. The entire cleaning and maintenance project was completed in five days.
