

### ***Bunting increases its college scholarship awards...***

Bunting Magnetics Co, Newton, KS, has announced the 2011-2012 recipients of its annual scholarship awards which are given to selected college-age children of company employees for either university or vocational training. This year 18 scholarships were presented each worth \$500. The firm's president Robert J Bunting, Sr, commented: "We began this programme in 2000 to support the aspirations of our employees' families. My parents, for whom these scholarships are named, were very close to their employees and valued their hard work and dedication. So this programme is something that is very close to my heart." Since 2000, Bunting has awarded 103 scholarships totalling nearly \$45,000 in recognition of the founders of the company. Each student must complete a written report to qualify for the bursary. Institutions of further education which will be attended by this year's recipients include Wichita State University, University of Indiana, Johnson County Community College, Friends University, University of Kansas, University of Tampa and Bethel College.
