

Seed merchant benefits from advanced bagging/palletising facilities

Long-established UK agricultural seed merchant Dunns (Long Sutton) Ltd has installed an automatic bagging and palletising system at its Lincolnshire plant. The requirement was for high-speed bagging of beans into open-mouth paper and woven-PP bags. The new system, supplied by Nottingham-based Chronos Richardson, includes duplex Chrono-Weigh E55 net bagging weighers and, at the end of the line, a Chrono-Pal compact palletiser of 1000 bags/h capacity. The neat and stable pallets have helped speed container loading times while also allowing on average an additional four pallet loads to be placed in each container.
