

Laboratory for development of new animal feed formulations

Dinnissen Process Technology, Sevenum, the Netherlands, is to open the Feed Design Lab in association with Imtech, DSM and Vitelia. The test facilities will be made available to companies in the animal feed industry which may wish to stimulate innovation in the development of new feed products. Nutritionists and feedstuff technologists will be able to test endless variations and combinations with widely diverging processing operations. Equipment will be available for grinding, sieving, weighing, mixing, dosing, drying as well as expanding, extruding and vacuum coating under strictly controlled conditions. Dinnissen will be exhibiting at the Victam animal feed, aquafeed and pet food trade show, 3-5 May, in Cologne (Stand E071). www.dinnissen.nl
