

## ***Freeman to contribute powder characterisation expertise at US seminar***

Tim Freeman, director of operations for Freeman Technology, Welland, UK, will be among the speakers at a special course on blending and flow of pharmaceutical powders being organised by Mixing Consultants Inc. at Pearl River, NY, USA, 23-25 February. Other presentations will be made by Professor Fernando Muzzio of Rutgers, the State University of

New Jersey; Ralf Kretzschmar, president of Glatt Systemtechnik GmbH; and Ralf Weinekötter, general manager of Gericke AG. Key elements of the course include regulatory perspectives, mixing of free flowing as well as cohesive powders, lubrication and powder flow issues. Further details are available at:
