

Blending and flow of pharmaceutical powders

UK-based Freeman Technology, in partnership with Gericke and Glatt Air Techniques, is sponsoring a new three-day course presented by Mixing Consultants, Inc. on the subject of blending and flow of pharmaceutical powders. The course will be run in the US and in Europe, beginning in Pearl River, New York, on 27-29 October and then at Graz University of Technology, Austria, from 9-11 December 2009. Each will feature high-level presentations given by academic experts from Rutgers University and by industry specialists including Tim Freeman, director of operations for Freeman Technology.
