

## ***GEA Pharma Systems signs Nordic agency agreement***

GEA Pharma Systems, Wommelgem, Belgium, the global technology specialist in the field of pharmaceutical processing, recently entered into an agency representation agreement with Christian Berner Tech Trade to sell its range of solids dosage systems throughout Sweden and Norway. This firm is one of the leading Nordic technical trading companies involved in the supply of processing and packaging technology for the pharmaceutical and cosmetics industry. The family-owned company has been a leading European manufacturer of process equipment since 1897 and has a long established working relationship with the GEA Group. The agreement covers supply and servicing of granulation and drying equipment of Aeromatic-Fielder and Collette, the pelletising and coating technologies of Aeromatic-Fielder, including NICA System, and also the containment materials handling technologies of Buck. Christian Berner Tech Trade has for many years represented GEA Niro spray driers for pharmaceutical applications.
