

## ***Specific ATEX approval for rotary valves***

The Components Division of Govoni Sim Bianca Impianti (GSBI), Casumaro (Ferrara), Italy, has acquired Dekra-Exam ATEX certification, Internal Zone 20, for its entire range of rotary valves.

This supplements the existing VRRC “ATEX” explosion-proof and explosion-isolation approved rotary valves designed for pressures up to 10 bar gauge. These high-specification valves, widely used in pneumatic conveying systems, will be displayed on Stand B66, Hall 9, at the K-Show which starts 27 October in Düsseldorf.
