

## ***ATEX-approved, explosion-proof rotary valves***

Govoni Sim Bianca Impianti, Casumaro, Italy, has introduced reinforced explosion-proof versions of its VRRC series of rotary valves which are designed for use as sealing devices to allow solid, powder or granular products to go through two different pressure environments or to be used as volumetric dosing devices. The VRRC “ATEX” valves have been certified for use in the following certified areas: External Zone – categories 3GD (zone 2-22) and 2GD (zone 1-21); and Internal Zone – category 1D (zone 20). GSBI’s components division is offering next-generation devices for pneumatic conveying applications, including equipment and technology previously developed by Sim Bianca, Govoni, Pulsair Machine and Cifa Progetti.
