

Sanitary checkweigher scales

Hardy Instruments, San Diego, CA, has introduced the Enviro range of checkweigher bench scales which have been designed to meet the needs of food and chemical industries for hygienic checkweighing electronics that withstand high-pressure, high-temperature washdown environments. The new series features four programmable checkweigh ranges having an ultra-thick overlay which is capable of withstanding punctures and abrasive cleaning agents. The equipment is available in Europe from B+L Industrial Measurements, Heidelberg, Germany.
