

## ***Rectangular silo vent filter***

Infastaub, Bad Homburg, Germany, part of the Intensiv-Filter Group, has introduced the new AJP 224 silo vent filter in rectangular design. The unit, which incorporates several of the proven features of both the company's INFA-JETRON type AJB 800 silo filter as well as its INFA-MAT AM 204 shaker filter, offers considerable installation versatility and enhanced performance. It provides a number of cost-saving features. For example, in the event of a replacement filter being needed, there is no need to change the silo connection flanges. The company is a leading global provider of industrial dedusting solutions and has local representation in 20 countries.
