

### ***Kek-Gardner arises from Kemutec collapse***

Following the entry into administration of Kemutec Powder Technologies Ltd in June, it was announced in late August that Kek-Gardner Ltd had been formed to manufacture and market the KEK, GARDNER and PPS brands of mills, sifters, mixers and blenders previously supplied by Kemutec. The new company will continue to operate from the same Macclesfield, UK, premises and retains many of the former staff including the senior management team of George Tunnicliffe, Martin Thomson and Steve Bayley who become, respectively, managing director, sales director and technical director of the new company. Kemutec's MUCON range of level indicators, flow control valves and discharge aids has been sold to a separate buyer. [www.kekgardner.com](http://www.kekgardner.com)
