

LC Packaging becomes Tellap distributor

LC Packaging headquartered in the Netherlands has become a licensed supplier for the novel Tellap palletless bulk bag system which was developed some five years ago in Australia. The company's UK subsidiary LC Packaging UK Ltd chose the occasion of the June Hillhead exhibition to launch the product in the British Isles. The Tellap bulk bag concept integrates the pallet into the bag fabric in the form of two reusable sleeves. These are light to handle, robust and easy to insert. Apart from eliminating the need for pallets, the system is safely stackable, rack compliant, ISPM exempt and the sleeves are fully recyclable. Tellap bags weigh considerably less than the conventional bag-plus-pallet – about 4kg compared with 37kg. Other licensed Tellap distributors in Europe are Kunze and Taihua Europa, both based in Germany. www.lcpackaging.com; www.tellap.com.au.

Tellap bulk bags with insertable sleeves now available from LC Packaging and (right) the sleeves occupy far less volume than traditional pallets as well as being significantly lighter
