

## ***Power mortar grinder for sample preparations***

Laarmann Group, Herten-Ool, the Netherlands, has recently introduced the MG 100 power mortar grinder which is designed to process solid materials in dry, wet or cryogenic condition. It is capable of handling samples from 10 up to 200ml and is suitable for use with a wide range of products including soil samples, various foodstuffs such as maize and grain, brittle materials such as glass, and different tablets as well as pharmaceutical raw materials. The machine offers variable speeds, allowing a broad range of sample preparation tasks to be achieved. It is also very quick and easy to clean.
