

## ***New general manager for Magnet Applications' US plant***

Dr Pete Lipetzky has been recruited as general manager for the DuBois, PA, facility of Magnet Applications, a subsidiary of Bunting Magnetics Company. Responsible for overseeing total manufacturing and sales operations at the plant, he will report to Robert J Bunting, owner and CEO of the parent company.

Dr Lipetzky has an impressive industrial and academic background relating both to metallurgy and other material science-based applications. He holds a PhD in Materials Science and Engineering/Applied Physics from Brown University as well as MSc degrees in both Mechanical Engineering and Applied Mathematics from the same university. He graduated Summa Cum Laude from Montana State University with a BSc in Chemical Engineering and holds an MBA (Master of Business Administration) from the Katz Business Program at the University of Pittsburgh.

Previously he served as a Professor of Mechanical and Materials Engineering at Pennsylvania State University, Rensselaer Polytechnic Institute and the Technical University of Vienna. Before joining Magnet Applications, he was director of technology and interim general manager at ATI Powder Metals in Pittsburgh, PA. Magnet Applications, which has manufacturing facilities at Berkhamsted in the UK as well as at DuBois, is a leader in the production and distribution of bonded magnets and assemblies.
