

## ***Mineral processing webinar to focus on slurry particle size analysis***

As part of Malvern Instruments' latest web seminar series, Matti Kongas, global technology manager, analyzers, at Finland-based minerals processing company Outotec will discuss the subject of on-line slurry particle size analysis in mineral processing applications. His webinar will be held on 28 September and participation is open to all at no cost. For further details and to register visit: [www.malvernevents.com](http://www.malvernevents.com). UK-headquartered Malvern Instruments and Outotec have worked together in the area of mineral processing for almost a decade, launching the PSI 500 on-stream particle size analyzer in early 2003. This was the first product to result from their collaborative work.
