

Particle measurement services rationalised in Nordic countries

Malvern Instruments and Particle Measuring Systems (PMS), both subsidiaries of UK-based Spectris Plc, have completed the transfer of sales and support for PMS products in Sweden, Denmark, Norway and Finland. For many years Malvern subsidiaries in these countries have provided local representation for the PMS range of particle counters, microbial air samplers and molecular contamination monitors. From beginning of March PMS has moved to direct support of the company's complete product range in the Nordic region, with sales and service teams operating from a newly established office: Particle Measuring Systems Nordic, Korskindelund 6, DK-2670 Greve, Denmark (tel: +45 70 70 28 55).
