

Module for automated high-precision weighing

The UK subsidiary of Switzerland-based Mettler Toledo has announced the introduction of the WMS high-precision weigh module. It has been designed for fast and precise filling of pharmaceuticals and check weighing of parts or quantities. It can be easily integrated into automated processes, either in production or in the laboratory. It is available in capacities up to 400g and a readability of 0.0001g. With a width of only 59mm, it is tailored to the needs of machine and equipment manufacturers for easy mechanical integration. www.mt.com/weigh-modules

Three applications for the WMS weigh module from Mettler Toledo
