

Norres moves into new Gelsenkirchen premises

Norres Schlauchtechnik, the leading German manufacturer of hoses and hose systems for transferring both solids and liquids, has relocated to a new address in its home town: Am Stadthafen 12-16, D-45881 Gelsenkirchen. The telephone number remains the same. At the new headquarters all company divisions, spanning sales, administration, product development, production and warehousing, are now under one roof. “The move will shorten the distances between individual departments and speed up the exchange of information to the benefit of our clients”, commented proprietor and MD Burkhard Mollen.
