

Reduced costs for collection and recovery of plastic waste

RIGK GmbH, Wiesbaden, Germany, for 2011 plans to maintain its level of charges for sustainable recovery of industrial packaging waste – and in many instances reduce them – despite significant recent increases in transport costs. 2011 fees for disposing of PE and PP plastic sacks as well as for bulk bags have been reduced by 10 euros per tonne, by 15 euros per tonne for combined plastic packaging and by 16 euros per tonne for rigid plastic packaging. Fees for the RIGK-G-SYSTEM, relating to return and recovery of plastic packaging for hazardous goods, will remain unchanged at their 2010 levels. RIGK's Romanian subsidiary (www.rigk.ro) provides similar return and recovery services for used packaging in Romania. Shareholders of RIGK GmbH are notable polymer and packaging producers.
