

## ***Storage facilities expanded for Belgian petfood producer***

SCE Silo Construction & Engineering, Lichtervelde, Belgium, has recently completed expansion to the Ostend silo complex it built in 2006 for Fides Petfood, a producer of private label cat and dog food. The original storage plant provided a capacity of 1765m<sup>3</sup> and this year a further 1360m<sup>3</sup> of capacity has been added in the form of 11 new smooth-wall cells together with a plug assembly system for raw materials. This investment was accompanied by substantial expansion to the warehouse and despatch areas. SCE is represented in the British Isles by GAME Engineering (see below). [www.sce.be](http://www.sce.be)

***Extra SCE silo storage cells have been added to the Ostend production plant of Fides Petfood***
