

Schenck acquires Clyde Process Solutions

Schenck Process Group headquartered in Darmstadt, Germany, at the end of February took over UK-based Clyde Process Solutions, a leading supplier of air filtration, pneumatic conveying and injection technologies. With its two operating subsidiaries, Clyde Materials Handling and MAC Equipment, Clyde Process Solutions employs over 500 staff at 10 offices located in the USA, Brazil, UK, South Africa, India, Singapore and China. Commenting on the acquisition Dr Jochen Weyrauch, president and CEO of Schenck, said: “This transaction represents an important milestone in our development and we believe its merits are compelling for both Clyde and the Schenck Process Group. Our combined product offering strengthens our position to deliver energy-saving and environmental solutions to key target markets. The complementary nature of the geographic reach and product and systems offerings of the Schenck Process Group and Clyde are fundamental to the strategic rationale for the transaction.” www.schenckprocess.com
