

Spiroflow in joint venture with Horizon Systems

Spiroflow-Horizon Systems Ltd is a new joint venture company formed by Spiroflow Ltd of the UK and its US partner Horizon Systems Inc. of Lawrence, KS, to market Horizon's expertise in designing process systems for handling dry bulk materials throughout Europe. Also on offer will be a full range of lean phase pneumatic conveying (pressure and vacuum), as well as continuous dense phase technology (pressure and vacuum) for handling delicate, friable, formed or extruded products such as snack foods, pet foods, agricultural seeds and plastic pellets with little or no damage. The joint venture company has installed a test plant within the Spiroflow technology centre at Clitheroe, UK, where it is already able to demonstrate the capabilities and benefits of its equipment to potential customers.
