

Open day at VDL Industrial Products

VDL Industrial Products headquartered in Eindhoven, the Netherlands, is organising an in-house exhibition on Friday 18 September together with its partners which include ATEX Explosionsschutz, Jacob Rohrsysteme, Inburex Consulting, STS Brandschutz, Mecanova and others. Taking place from 10 am until 5 pm, the VIP Experience 2009 will include various workshops on different aspects of bulk handling technology and dust explosion protection as well as several demonstrations involving live explosions. Part of the VDL Group which has a staff of about 7100, VDL Industrial Products supplies complete systems for explosion and fire safety during industrial processing as well as providing service and maintenance back-up. It also makes and supplies components for extraction systems and bulk materials handling, such as modular tube systems, rotary valves, fans, cyclones, diverter valves and butterfly valves. www.vdl-ip.com
