

Advances in non-contact level measurement

Latest products from Vega Grieshaber, Schiltach, Germany, for non-contact level measurement of bulk solids under difficult conditions include: the VEGAPULS 67 and 68 radar sensors which can perform accurately in dust-laden atmospheres, at high temperatures and during filling operations; the VEGAMIP 61 microwave barrier; and the ProTrac nucleonic measurement system which provides a flexible answer to the most complex measurement tasks. www.vega.com
