

Vortex appoints Iberian Peninsula agent

Barcelona-based Iberfluid Instruments has been named official agent in Spain and Portugal for Vortex Valves Europe, Darlington, UK. Established in 1972, Iberfluid specialises in providing industrial solutions for the plastics, food, chemical and pharmaceutical industries. With two Spanish branch offices outside Barcelona and a third planned for Lisbon, the company operates several divisions including a solids handling division headed by Xavier Miquel. It will manage technical inquiries and service for Vortex's full range of slide gates, diverters and iris valves which have been designed specifically for handling dry bulk solids in gravity, vacuum, dilute or dense phase applications. www.iberfluid.com; www.vortexvalveseurope.com
