

## **Whitehouse Scientific expands team**

Whitehouse Scientific, Waverton, UK, has appointed Keith Brocklehurst as senior scientist specialising in R&D. He is expected to bring additional analytical expertise to the company while applying even greater focus to the development of new particle size and shape standards. His auditing skills are also likely to result in the development of new instrumentation for precision certification of reference standards and filter calibration. He has lectured widely on particle characterisation and analytical science, has been involved in organising many symposia, meetings and workshops, and has developed global academic connections during his career. CEO Graham Rideal commented: "I have had the privilege of working with Keith in various capacities over a number of years and am delighted that he has joined the Whitehouse Scientific team. He brings the benefits of more than 40 years experience in the analytical chemistry sector to our company, having worked with ICI for 28 years in particle characterisation and analytical chemistry roles before moving to LGC in 1998. He is a fellow of the Royal Society of Chemistry (FRSC) and has served on the RSC Particle Characterisation Interest group in various roles since 1989.
